

# New world of cryptocurrency

**White Paper**

## Albino Token

Thank you for taking a moment to read through our white paper. Over the last few months, we have been working tirelessly to bring something new to the cryptocurrency world. We believe we've accomplished this with Albino Token. A passion for change has brought us together as a team to create Albino Token. A multitude of coins & tokens has been created with little to no purpose. Albino Token is a purpose-driven token. We have a passion for change all over the world, and as such, we know Albino will be the token that not only changes lives but changes the way you think about cryptocurrency. We are working nonstop worldwide and around the clock to bring something very special to our users and investors. Buying, selling, and trading will happen as always, but we envision Albino Token being used for social change in your local area and beyond. Albino Token has the potential to be a world-changing cryptocurrency, and you have the unique opportunity to be a part of that change.

## ABOUT THE ALBINO TOKEN (ABO)

Our vision was to design, develop, and deploy a cryptocurrency that stimulates and engages the human spirit. Each member of our core team has a humanitarian idea that is close to our hearts. We have agreed to allocate a percentage of the proceeds generated from our ICO and develop plans for fundraising to support charitable organizations worldwide. A foundation to provide fundamental basic needs such as education, food, clean water, clothing, shelter, and medical care for those in need. Collectively, we envision the cryptocurrency community can make a positive impact simply by purchasing Albino Token. Our plans include a rewards program, staking, debit card, secure mobile application, and eventually, our own Albino cryptocurrency exchange. Our goal is for Albino Token to be available globally, listed on exchanges that support every possible region while providing lightning-fast and secure transactions to individuals and businesses alike.

## JOIN THE ABO COMMUNITY

Joining the Albino community is the first step to positively impacting both the environment and humanity. The ABO is funded by 10% of all proceeds generated by the sale of the token. The Albino token plan focuses heavily on providing support to areas that need it most and will address some of society's most significant challenges. With your help, our community goals can be achieved on a global scale. As Albino Token gains recognition, we'll have an ever-expanding portfolio of initiatives to promote our agenda worldwide. ABO is a true community-centric entity, which allows you to become the voice. We encourage you to submit ideas focused on making a change, changes that you don't have the power to enact independently. You WILL ALWAYS be heard as we value our users just as much as we value bringing positive change to the world. We are currently working on additional concepts that will help grow.

## THE FUTURE OF ABO

Albino token is a full-on-chain liquidity protocol with Decentralized financing that can be implemented on any smart contract-enabled blockchain. It has been attached with ABO Smart Chain, designed with maximum usage facilities for the investors, and can fuel innumerable online services. The project has been developed by the developers to ensure maximum security and guarantee better rewards. Its roadmap, token distribution, and coin burn programs are clearly defined so Albino token investors can have the utmost confidence in the project. The token is sure to help investors attain maximum financial freedom while also distributing Albino token rewards to everyone using the token. As a result of this, every albino token holder is incentivized to spread the use of the albino token as much as possible. As the platform gains more traction and more transactions occur on the network, the token will benefit from an increased exposure, which would ultimately help investors in the long run.

## THE FUTURE OF ABO

Albino token is a decentralized smart token project built on the BSC network. The project was created to solve real-world issues while also benefiting investors. Unlike the Ethereum network, the ABO Smart Chain allows transactions to be conducted much faster and for a small fraction of the cost.

ICO 10% of all ICO sales go directly to The Albino Token (ABO)

## Low fees

Why pay more?

ABO runs on Binance Smart Chain, a blockchain with much lower transaction costs than Ethereum or Bitcoin.

Trading fees are lower than other top decentralized exchanges, too, so that's a double win for you!

## TOKENOMICS

### **Decentralized Token:**

Trade directly from your wallet app. Unlike centralized exchanges like Binance or Coinbase, ABO doesn't hold your funds when you trade :

you have 100% ownership of your cryptocurrency.

## TOKENOMICS

### Token burning:

Albino Token will participate in token burning, which will occur in monthly intervals. The percentage of tokens burned will be 10% of our total supply until our circulating supply goal of 80% has been reached. We aim to keep our total store above 5 trillion tokens.

This goal is fundamental to the team, and we promise, in time, we will achieve this. Token burning will begin once the ICO stages have all been finalized. Burning our tokens will help stabilize and influence the price in the long run. All the tokens that we burn will be posted on our website each month, providing all the relevant information so you can see the burned tokens for yourself.

## TOKENOMICS

### Staking:

If you didn't know already, staking has become a prevalent topic within the cryptocurrency industry. Staking allows you to earn extra coins/tokens by holding a certain amount in a locked wallet, usually on an exchange. Staking has the potential to make an annual passive income averaging 20% or higher as other cryptocurrencies offer variable yields.

Although Albino Token will not provide to stake straight away, it will become available further down the line; the amount you can earn is still unknown. We will announce this across all of our social media platforms when this feature becomes available for our users. Stay tuned.

## TOKEN SALE:

Distribution includes all tokens allocated for private and public sales. Pre-Sale: We will host a KYC whitelist pre-sale for stakeholders to participate in (5BNB Per Holder) with a hard cap of 1000BNB. Public Sale: albino token will be available to the public once we have reached our Pre-Sale cap.

## WHY CHOOSE Albino Token?

The previous year was no doubt an eventful one for the whole of humanity. The pandemic has disrupted the ordinary lives of millions of people around the world, particularly in developing economies. At a time like this, the albino token aims to contribute to social good by helping people in need. The platform will raise funds to support various causes through donations to charity organizations. You automatically donate to charity when you buy, as we have implemented a charity feature into the transaction fee model. For every transaction conducted on the platform, 2% will be deposited into the charity wallet. The wallet will support donations to various humanitarian projects around the world. This is our way of giving back to the world towards making it a better place.

## WHY CHOOSE Albino Token?

Currently, it's difficult to swap tokens without having to pay ungodly fees to exchanges. Even worse, new projects sometimes get mislabeled scams because they lack proper exposure and the right tools necessary for launching a successful project. We will launch our decentralized exchange to help investors perform token swaps with ease. Token holders will be able to contribute their holdings into the liquidity pools and receive LP rewards. Also, the exchange will act as a launchpad for smaller early-stage projects to quickly launch their tokens and manage their ICOs using an already established platform.

## WHY CHOOSE Albino Token?

We will launch our mobile app with a built-in system for everything related to cryptocurrency investment. The app will feature a dashboard where you can easily track the tokens in your portfolio. There'll also be a built-in rug-pull checker to check if a new project will likely be a rug-pull or not. In summary, the albino token offers investors price profitability in the long term due to our token being used as a utility in different real-life use cases.

## NFT

The music industry has a ticketing problem where tickets for music concerts, live shows, or festivals can be faked. The sad truth is a lot of people fall victims to fake ticket selling, particularly online. Nearly 11 million people are affected by counterfeit token sales yearly. A lot of them buy tickets from websites only to get turned away from gigs. Some even get scammed outrightly, as they purchase tickets and never receive them. We will be launching NFTs for our soon-to-be partners to solve this problem. Our NFT team will make individual tokenized event tickets so that they can't be faked or reproduced. Even better, we will launch a sophisticated verification system that can check for the authenticity of these tickets when they are presented at the event venues. Another application of NFTs in the music industry will be making NFTs for artists in a particular concert and make fans bid on the exclusive NFTs for these artists. For instance, you will own an NFT of a memorable moment of your favorite artist at a concert you attended.

Thank You
